MARIAM AMGAD

Flutter Developer

Alexandria, Egypt | 01284607206
LinkedIn: linkedin.com/in/mariam-amgad-33094b446 | GitHub: github.com/mariamamgad18

SUMMARY

Flutter Developer with hands-on experience building mobile applications with Flutter and Dart through training and personal projects. Experienced in Clean Architecture, Bloc/Cubit state management, and REST API integration, with apps covering authentication, shopping cart, geolocation, local notifications, and multi-language support. Eager to growin a collaborative team and deliver clean, responsive, user-friendly mobile products.

TECHNICAL SKILLS

Languages: Dart
Mobile: Flutter, Responsive UI, Localization (i18n, RTL), Platform Channels, Local & Push Notifications (FCM)
Architecture: Clean Architecture, MVVM, Repository Pattern, Use Cases, SOLID, OOP, Design Patterns
State Management: Bloc / Cubit, Provider
Networking & Data: REST APIs, Dio, Retrofit, HTTP, JSON Serialization, Firebase, SharedPreferences
Tools: Git, GitHub, Postman, Figma, build_runner

PROJECTS

Islamic App | github.com/mariamamgad18/Islamic/tree/logic
Tech: Flutter, Dart, Bloc/Cubit, Dio, Retrofit, Geolocator, Local Notifications

- Built a multilingual Islamic app (Arabic, English, French, Urdu; RTL) using Clean Architecture and Bloc/Cubit.
- Implemented location-based prayer times and 7-day Athan scheduling with exact alarms and a native Android foreground service, connected via MethodChannel.
- Developed a Qibla compass using geolocation and device sensors, calculating bearing and distance to Makkah.
- Integrated Aladhan, Quran, and Google Places APIs with Dio and Retrofit; added nearby mosques and customizable reminders.
- Added offline Azkar & Duas (local JSON) with favorites, Quran reading with filters, and an electronic Tasbeeh.

Route E-Commerce App | github.com/mariamamgad18/e_commerce/tree/Develop
Tech: Flutter, Dart, Bloc/Cubit, Dio, Retrofit, SharedPreferences

- Built a full e-commerce app with Clean Architecture (Data / Domain / Presentation) and Bloc/Cubit.
- Implemented authentication with token persistence, product catalog (categories, brands, details), and a full cart (add, update, delete, live badge).
- Integrated REST APIs with Dio and Retrofit; built a custom interceptor mapping network and server errors to typed exceptions.
- Applied dependency injection and DTO-to-entity mappers for a maintainable, layered codebase.

Listenary (Graduation Project) | github.com/mariamamgad18/Listenary.git
Tech: Flutter, Flask API, Firebase Authentication, MongoDB, OCR, Text-to-Speech

- Collaborated in a team to build an app that converts scanned documents and books into accessible audio using OCR, AI text summarization, and Text-to-Speech.
- Developed the Flutter client integrated with a Flask API, Firebase Authentication, and MongoDB, with Arabic and English support.

TRAINING & COURSES

Flutter Diploma - Route Academy | 2025 - Flutter and Dart, application architecture, API integration, state management, responsive UI.
Flutter Training - My Communication | 2024 - Flutter and Dart fundamentals, UI development, state management.
Data Science & Data Analysis Training - SAS | 2023 - Data analysis and data science fundamentals.

EDUCATION

Bachelor of Computer and Data Science, Alexandria University | 10/2021 - 07/2025

LANGUAGES

Arabic (Native) | English (Proficient)
